PROFILE

Computer Science graduate with hands-on experience in Python-based data analytics, financial data reconciliation, business intelligence, and process automation. Completed a Data Analyst internship at Bosch Mobility Platform and Solutions India, developing and deploying AWS billing reconciliation solutions for regional business operations. Experienced in Python, Pandas, Excel automation, ETL, dashboard development, data validation, AWS EC2, and automated reporting. Strong ability to transform complex operational and financial data into reliable, automated solutions that reduce manual effort and improve reporting efficiency.

TECHNICAL SKILLS

- Programming: Python, JavaScript
- Data Analysis: Pandas, NumPy, Data Cleaning, ETL, Data Validation
- Automation: OpenPyXL, Excel Automation, Automated Reporting
- BI & Dashboards: Streamlit, Dashboard Development, KPI Reporting, Data Visualization
- Cloud: AWS Billing & Cost Analysis, Amazon EC2
- Web & Database: React.js, Node.js, MongoDB
- Tools: Jupyter Notebook, VS Code

PROFESSIONAL EXPERIENCE

Data Analyst Intern | Bosch Mobility Platform and Solutions India Pvt. Ltd.
Feb - Jul 2026

- Developed and deployed Python-based AWS billing reconciliation dashboards for Europe and India, automating invoice extraction, consumption comparison, financial reconciliation, and reporting workflows
- Deployed the reconciliation application on an Amazon EC2 instance within the Bosch MPS environment for operational use
- Implemented currency conversion, automated file reprocessing, invoice data processing, and bulk report generation, reducing repetitive manual effort
- Independently designed a variance-validation mechanism for the India reconciliation system to identify billing discrepancies and improve reconciliation accuracy
- Built a lead generation platform with automated lead collection, hot/cold lead segmentation, and email follow-up workflows
- Designed a service-performance dashboard on the AMNIC platform, automating monthly KPI reporting and performance analysis
- Supported data pipeline testing, data restructuring, data validation, and business reporting automation

Full Stack Developer Intern | Athenas Technologies, Madurai
2025

- Led a development team, coordinating planning and implementation for real-time client web applications

Web Development Intern | Hazzino Technologies, Theni
2024

- Contributed to frontend/backend development, UI improvements, and performance debugging

KEY PROJECTS

AWS Billing Reconciliation Platform (Bosch MPS) - Python, Pandas, OpenPyXL, Streamlit, AWS EC2, PDF Processing

- Developed an automated platform for AWS invoice and consumption reconciliation across regional billing environments
- Automated invoice data extraction, currency conversion, reconciliation, validation, and report generation
- Deployed the application on Amazon EC2 within the Bosch MPS environment for operational use

Other Projects

- Lead Generation & Follow-up Automation Platform - automated lead collection, hot/cold segmentation, and email follow-up workflows
- AMNIC Service Performance Dashboard - automated monthly KPI reporting and performance analysis
- EchoSnap - Civic issue reporting platform
- Tail of Time - E-commerce application
- Room Allocation System & Library Management System

EDUCATION

B.E. Computer Science and Engineering - NSCET | 2026

CGPA: 8.5 / 10

CERTIFICATIONS

- MongoDB Associate Data Modeler
- Python Developer
- Java Programming
- Cisco Networking
